

100 % SMART-Trailer

The benefits at a glance

All SCS SMART curtainsiders, S.KO COOL SMART refrigerated semitrailers and S.KO EXPRESS SMART dry freight vehicles are equipped with TrailerConnect® telematics as standard.

Extensive sensor technology, optimally networked with the TrailerConnect® control unit, so that you receive even more trailer data in real time from your vehicles and can link it intelligently.

A good solution should be simple. One that gives you more time for your business.

Everything from one source

Premium-Services form Schmitz Cargobull

SERVICE PLUS package for SmartTrailer

For new vehicles with TrailerConnect® telematics as standard: box vehicles and curtainsiders with the security of comprehensive Schmitz Cargobull services.

- Planning reliability and uncomplicated handling thanks to the services included in the Basic Service Trailer or Full Service Trailer contracts
- High availability at fixed costs: For refrigerated trailers, the full service refrigeration unit with checks, maintenance, repair according to manufacturer's specifications and breakdown service for the transport refrigeration unit.
- Protection against breakdown and optimisation of fuel consumption through the integrated tyre pressure monitoring system (TPMS)
- Low TCO (Total Cost of Ownership) for optimum value retention and thus increased resale value of the trailer
- More transparency and better evaluations with the telematics service upgrade
- Process optimisation and fleet monitoring through the "Tour Management", "Event Management", "Data Sharing" modules
- More control and safety for refrigerated box vehicles through the additional modules "Fleet Management", "Remote Door Lock" and "Remote Control "**.
- Pro-active monitoring and remote control when using the TL3** door locking system as an additional service for the Schmitz Cargobull S.CU refrigeration machine
